Divide & Connect Screen

A clear and opaque roller blind* to protect your colleagues, consumers & partners while connecting them in a safe way. Stops the transmission of several contaminations.

Infinite versatility; separation between workplaces, receptions, public spaces, and much more.

Protection as soon as desired; possible to roll up or unroll through a cord. Completely rolled up it barely takes up any space in use.

Very easy to install thanks to a bracket that fits almost any (system) ceiling.

Hygienic in use, especially when compared to standing protection elements on surfaces, a roller blind does not prevent you from cleaning regular surfaces. Warm water with detergent will clarify the job. After cleaning with a damp cloth, we recommend to dry it with a dry cloth.
